Expense Tracker [Apr 2021, IJRASET]

Abstract

This Expense Tracker is a web application that facilitates the users to keep track and manage their personal as well as business expenses. The user will be able to add there expenditures instantly and can review them anywhere and anytime with the help of the internet. He can see the accurate duration for how long a particular product is being used by him. The monthly and year-wise comparison of expenditures will be done by the app which will let the user know the area where he is spending the most.

Advantages:

- This project will provide a lot of benefits to the users with the help of which they will be surely able to keep track of each penny.
- Stop using paper and excel sheets to keep track of your digital as well as cash payments.

Disadvantages:

- If a person is not able to manage his expenses, he is likely to end up in a crisis.
- Due to low salary, most of the time it is because of improper money management skills.

e Expense: A Smart Approach to Track Everyday Expense

Abstract

Tracking regular expense is a key factor to maintain a budget. People often track expense using pen and paper method or take notes in a mobile phone or a computer. In this work, we are proposing an automated system named e Expense to store and calculate these data. e Expense is an application that runs on Android smartphones. By using this application, users can save their expense by simply scanning the bills or receipt copies. It also monitors user's income by tracking the received SMS's from the user's saving accounts. By calculating income and expense it produces the user's balance in monthly and yearly basis.

Advantages:

- This is a smart automated solution for tracking expense.
- This application extracts the textual information from the receipts and saves the amount and description for further processing.

Disadvantages:

- There is no proper security managers.

Expense Tracker [MAY 2021, IRE Journals]

Abstract

In this project they develop an android application named as “Expense Tracker”. This system used to track the daily expenses of the user. This application takes the income of a user and manage its daily expenses so that the user can save money. If you exceed daily expense allowed amount it will give you a warning, so that you don't spend much and that specific day. If you spend less money than the daily expense allowed amount, the money left after spending is added into user's savings.

Advantages:

- Automatically it will keep on sending notifications for our daily expenditure.
- It helps the user to manage expenses so that the user is the path of financial stability
- Expense Tracker project is for keeping our day-to-day expenditures will helps us to keep record of our money daily.

Disadvantages:

- It doesn't represented in graphical model.
